## Press Release

### Azimut: Update on Opinaca A and B, James Bay region, Quebec

Longueuil, Quebec. - **Azimut Exploration Inc.** (“Azimut”) and its partner **Everton Resources Inc.** (“Everton”) report results of the winter/spring 2008 drill program on the Opinaca A and B gold properties.

Twelve holes totaling 1,600 m were completed by Everton to test coinciding airborne electromagnetic conductors, induced polarization anomalies and geochemical anomalies on the Smiley, Lola, and Charles Targets located on Opinaca A and the Dominic Target on Opinaca B. Most of the drill holes intersected altered sediments containing a variable amount of sulfide mineralization. Due to technical problems in cutting thick overburden to reach the bedrock, many planned drill holes were abandoned on the Lola and Smiley Targets and the drilling program was modified. The re-designed drill program succeeded at intersecting anomalous gold values at the Smiley and the Dominic Targets.

Results include 4.24 g/t Au over 1 m and 0.38 g/t Au over 1 m in Hole OS-08-04A at the Smiley Target on Opinaca A and 0.55 g/t Au over 0.3 m and 0.60 g/t Au over 1.2 m in Hole DB-08-01 at the Dominic Target on Opinaca B. The Smiley Target on Opinaca A is located 5 km north of the Eleonore Gold Deposit (3.7 million ounces indicated and inferred gold resource) where **Goldcorp Inc.** reported in their 2008 Second Quarter Report the conduction of intensive drilling in the north and south extensions of the deposit.

Azimut and its partner Everton are currently integrating the new results with the regional dataset in order to prepare the next round of exploration work on Opinaca A and B. Future drill programs will require heavier drill equipment in order to test targets located below thick overburden coverage.

Fieldwork was performed under the supervision of Marc L'Heureux, P. Geo. and VP Exploration of Everton, who acts as Everton's Qualified Person as defined by NI 43-101. Samples were assayed by Laboratoire Expert Inc. of Rouyn-Noranda, Quebec and ALS Chemex of Val d'Or, Quebec. This press release was prepared by geologist Jean-Marc Lulin, Azimut's Qualified Person. Azimut is a mineral exploration company using cutting-edge targeting methodologies with the objective of discovering major ore deposits.
