## Press Release

### **Azimut's partner Aurizon accelerates exploration at Rex South (Gold-Silver-Copper-Tungsten) in Nunavik, Quebec**

Longueuil, Quebec – **Azimut Exploration Inc.** (“Azimut” or “the Company”) is pleased to report that its partner **Aurizon Mines Ltd.** (“Aurizon”) will invest a total of **\$5.1 million** in exploration work in 2011 on two (2) properties under option agreement with the Company, including \$4.1 million on the Rex South property.

#### **Rex South Property** (1,822 claims, 794 km<sup>2</sup>)

Following the discovery of a major gold-silver-copper-tungsten mineralized zone on the Rex South property in 2010, Aurizon has planned a 2011 exploration budget totalling \$4.1 million. The zone occurs in an area of significant outcrop exposure and has been recognized over a strike length of 3.3 kilometres and a width of 50-200 metres, and is open in all directions. A 4,000-metre drill program will test the discovery zone, and surface sampling will be carried out on other copper-gold anomalies identified through geophysical and geochemical surveys.

The Rex South property has strong exploration potential based on extensive geochemical anomalies, geophysical signatures and the presence of several mineralized prospects, including high-grade gold and copper values obtained from grab samples (see press releases of November 8 and December 20, 2010).

#### **Opinaca A & B Property** (649 claims, 338 km<sup>2</sup>)

Following the signing of a Letter of Intent, as announced on September 16, 2010, Aurizon plans to initiate a \$1.0 million exploration program consisting of surface sampling, geophysical surveys and 2,000 metres of drilling on the Opinaca A & B property in 2011.

The property is located in the James Bay area in close proximity to Goldcorp's Eleonore gold deposit. Exploration work performed by Azimut and Everton Resources (“Everton”) at Opinaca A & B since 2005 led to the discovery of significant gold mineralization. Azimut and Everton currently own a 50% interest each on the property, whereby Aurizon can acquire up to 60% undivided ownership interest.

This press release was prepared by Jean-Marc Lulin, P.Geo., acting as Azimut's Qualified Person under NI 43-101. Azimut is a mineral exploration company using cutting-edge targeting methodologies with the objective of discovering major ore deposits. Azimut holds the largest mineral exploration portfolio in Quebec.
