Press Release

Azimut reports on gold results from the Nantais Project, Nunavik, Northern Quebec

Longueuil, Quebec – **Azimut Exploration Inc** (“Azimut”) (TSXV: **AZM**) reports encouraging gold results from the late summer 2011 prospecting program on its 100%-owned Nantais property in Nunavik, northern Quebec. The project is located about 80 km south of Xstrata’s world-class Raglan nickel mine and 115 km southwest of the Inuit village of Kangiqsujuaq. A follow-up program is being planned for this summer to further assess the property’s potential.

Highlights of the 2011 prospecting program include Azimut’s discovery of two new gold prospects (**16.7 g/t Au** from an outcrop and **26.1 g/t Au** from a near-source boulder). Note that grab samples are selective by nature and unlikely to represent average grades on the property. Twenty-four (24) grab samples were collected, generally from outcrops. Significant results are presented below.

Sample #	Gold (g/t)	Silver (g/t)	Copper (%)	Zinc (%)
L253151	0.262	5.77	-	1.35
L252152	0.168	14.4	0.11	0.62
L253155	-	10.2	0.20	1.78
L253160	16.7	19.5	0.32	-
L253161	26.1	6.28	0.20	0.13

Historical results on the property include the following assays:

Nantais-1:	4.7 g/t Au , 5.2 g/t Ag, and 0.11% Cu
Nantais-2:	7.9 g/t Au and 7.2 g/t Ag 15.9 g/t Au , 7.5 g/t Ag, and 0.14 % Cu over 0.2 m (channel) 8.0 g/t Au , and 0.15% Cu over 0.6 m (channel)
Cabane:	0.47 g/t Au, 1,600 g/t Ag , 0.15% Sb, 0.12 % Cu, 2.48% Zn , and 7.00% Pb

The Nantais property comprises 211 contiguous claims covering an area of 88 km². To date, mineralization has been recognized along a 2.5-km-long prospective trend, open in all directions. The prospects are hosted within a north-trending unit of mafic volcanic rocks belonging to the Nantais Complex in the Minto Subprovince, a geological division of the Archean Superior Province.

Rock samples were assayed by ALS Chemex in Val-d’Or, Quebec. This press release was prepared by geologist Jean-Marc Lulin, a Qualified Person under NI 43-101.

Azimut is a mineral exploration company with the objective of discovering major ore deposits. The Company’s core business is project generation using cutting-edge targeting methodologies, along with partnership development. Azimut holds the largest mineral exploration portfolio in Quebec, including key gold, copper, uranium and rare earth element properties.
