Press Release

Azimut: 6 exploration programs underway in the James Bay region

Azimut Exploration Inc. (“Azimut”) announces that six gold exploration programs are currently underway on properties that are held 100% by Azimut in the James Bay region of Quebec. A minimum budget of \$1,550,000 – wholly financed by Azimut’s partners – has been allocated for this year’s work on the properties, which total 1,822 claims and 958 km² (see accompanying figure to press release of May 25, 2005).

Opinaca properties (A and A-East blocks, B and B-North blocks): first phase, consisting of systematic lake bottom sediment sampling and prospecting. The partner, Everton Resources Inc., is the operator (budget of \$500,000).

Opinaca properties (C Block and D Block): systematic soil sampling, prospecting and helicopter-borne magnetic and electromagnetic surveys (VTEM system). The partner, Eastmain Resources Inc., is the operator (budget of \$450,000).

Eastmain West Block property: systematic lake bottom sediment sampling, prospecting and till sampling (glacial sediments). The partner, Cambior Inc., is the operator (budget of \$200,000).

Wabamisk property: systematic lake bottom sediment sampling, prospecting, till sampling (glacial sediments) and airborne magnetic surveys. The partner, Placer Dome (CLA) Limited, is the operator (budget of \$400,000).

Azimut is a mineral exploration company utilizing cutting-edge targeting methodologies to reduce exploration risk and discover major ore deposits. The Company currently has 14.44 million issued shares.

Jean-Marc Lulin, geologist, was responsible for preparing this press release and is a qualified person according to National Instrument 43-101.
