

# A Leading Multicommodity Explorer in Quebec

- ▲ Largest multicommodity mineral exploration portfolio in Quebec, Canada
- ▲ One of the most active junior exploration companies, with a unique targeting methodology
- ▲ Long exploration history in the province with an in-depth local knowledge and experience
- ▲ Exposure to Gold, Copper, Nickel, Lithium

## ACTIVE FIELD PROJECTS

### Elmer Gold – 100% Azimut

Maiden resource estimate for the Patwon Zone (NI 43-101 Report):  
Indicated: 311,200 oz at 1.93 g/t Au  
Inferred: 513,900 oz at 1.94 g/t Au

Minimum **3,000 m diamond drilling exploration phase in progress** to test high-quality targets.

**Prospecting underway along the 35-km-long project**, leading to the discovery of a new copper-gold zone open in all directions.

### Galinée Lithium – Azimut-SOQUEM JV

**Initial drilling delivering strong results** including 1.62% Li<sub>2</sub>O over 158 m; 2.48% Li<sub>2</sub>O over 72.7 m and 2.68% Li<sub>2</sub>O over 54.6 m.

Preliminary delineation of a shallow dipping 700-m-long mineralized zone largely open to the east and south.

**Metallurgical tests in progress by SGS.**

**Till sampling and prospecting phase in progress** along the 36-km-long prospective geology

### Pikwa Lithium – Azimut-SOQUEM JV

**Till sampling and focused prospecting underway**, with drilling contingent on results.

### JBL1 Lithium – 100% Azimut

High resolution remote sensing survey completed **in preparation for an initial prospecting phase.**

52 km by 28 km project covering an intense lithium-cesium-rubidium-gallium-tin anomaly in lake sediment.

### Corvet & Kaanaayaa Lithium Option to Rio Tinto

**Comprehensive prospecting phase underway.**

### Pilipas Lithium – Option to Ophir Metals

Discovery of spodumene pegmatite outcrops near main highway.

**Prospecting completed, with maiden drilling program to follow.**

### Kukamas Nickel-Copper, Gold Option to KGHM

High resolution remote sensing survey and infill lake-bottom sediment survey completed, **in preparation for a focused prospecting phase and, potentially, a drilling phase contingent on results.**
